

TD SAT & SOUND

DUAL AWARD-WINNING HONOUR FOR MARBELLA COMPANY

TD Sat & Sound has received two prestigious awards from its manufacturer. The first was "Platinum Partner for 2018", representing recognition that the company is selling above a certain level of Control4 products. Only one other Spanish company (in Mallorca) has the same status. The other award was the "Pinnacle": one of only three presented in Spain. According to TD Sat & Sound, the Pinnacle is the highest award any company can receive from a supplier, meaning they are one of the best in sales and product knowledge, with an excellent end result for the end customer.

"These awards show us that our dedication and detail for quality pays-off. Our philosophy isn't to become the biggest domotics (home automation) company on the Coast, but definitely to be one of the best. We would like to take this opportunity to reach out to new collaborators such as architects, developers and builders. We want everyone to feel welcome in our showroom at the Marmorin Design Center to have a chat, without any obligation, and see if we can help each other."

As for their business outlet, the company said, "We have been in the Marmorin Design Center for around a year and we can now see how positive this new concept is. Each company focuses on what it does best enabling us to work with talented professionals within their field. We have created a special wall with demonstration models so clients can see how our products would work in a home such as their own. We have also created different areas with some exciting products, for example, outdoor speakers designed in stone and marble. In addition, we have a music corner with a vinyl record player, which is becoming more popular as it offers better quality music than a normal mp3 file."

For Doris Kavcic, owner of Residencias Lujosas Vitalux, S.L., corporate social responsibility is a key element of her company's ethos. "Every year we worry about gifts for people who already have almost everything. This year at Vitalux we are concerned about donating many

outdoor sleeping bags to those who do not even have a home, and who don't have the financial opportunities to obtain one. Let yourself be inspired!"
